Product Grade : EXXONMOBIL LL1001KW (EX SINGAPORE)  
EXXONMOBIL LL1001XV (EX SINGAPORE)

---

UNITED STATES :

Food and Drug Administration / FDA

21 CFR 177.1520, - "Olefin Polymers" - par.(c) 1.2a

and may therefore be used in materials or articles which are intended to contact foods at or below cooking temperatures, provided the finished material or article is technically suitable for the intended use.

See Note(s) : NG0500 NF400

Note : NG0500

The manufacturer of food-contact materials and articles - made from or containing this polymer grade - must ascertain that these finished materials or articles meet the general regulatory requirement that they do not bring about an unacceptable change in the composition of the foodstuffs or a deterioration in the organoleptic characteristics thereof.

In addition, the finished food-contact material or article must be technically suitable for the intended use.

Note : NF400

Sincerely,

Johnson Jiang  
Application Technologist
